EXPERIENCE

Web Developer | Axioned Pvt Ltd   Dec 2019 - Present

- Experienced in developing cross-browser, responsive web applications.
- Ability to collaborate between multiple teams to create reusable and readable code.
- Flexible to learn new technologies and a quick learner.
- Good verbal, interpersonal skills and a team player.
- Performed root cause analysis and solved general issues that occurred during tech support.
- Worked on various API's development & consumption in PHP and Javascript
- Implemented UI with pixel perfect precision of multiple templates.Developed interactive and dynamic web pages with fast load time or page speed score.

E – Commerce Application
This app has features like dynamic categories for products, dynamic cart, payment gateway using Stripe,Authentication system using firebase. Persistence of data after page refresh using Redux-Persist. User data is persisted in firebase so after login the old data is still saved. Memoization of data at appropriate places. Retrieving only required data instead of everything from redux-state using Selectors. (ReactJS, React Hooks, Redux, Firebase, Stripe, Sass)

Enhancement Projects
Integrated new additional features such as categorical bifurcation of presentations and placemats, download and generation functionality.Created various API endpoints in framework based web apps by following appropriate coding standards and linting in a git tracked environment. Migrated and revamped a Wordpress CMS web app to Jamstack and Eleventy SSG environment. Contributed from Initial setup phase till the deployment phase and handled server maintenance activities.

Certifications

 Ethical Hacker *and* Penetration Testing (Pristine)
